Description

Trade Hunter's Sustainable Development Goals (SDGs) impact assessment. Trade Hunter is a project focused on stock market and financial education, providing detailed information on investments and finance. The platform seeks to improve accessibility and understanding of financial instruments, helping to increase income and encourage participation in investments.

Strategic choices

These are the prioritised areas that we will take action on.

- ☒ Positive impacts we can strengthen even further
- ☐ Negative impacts we can eliminate or minimise
- ☐ Knowledge gaps we need to fill

Strategy

While the Trade Hunter project has had a positive impact on a number of SDGs by making significant improvements, it also has the potential to contribute positively to additional goals. First, the platform can implement measures that foster social inclusion, such as facilitating access to financial information for underrepresented groups. It can also promote education and awareness of important issues by providing educational resources on personal finance, ethical investments and sustainability. Strategic collaboration with other entities allows Trade Hunter to seek partnerships to work on specific areas of the SDGs. Finally, to promote sustainable financial practices, the platform can provide recommendations and resources to help users make ethical and socially responsible financial decisions.

NO POVERTY

End poverty in all its forms everywhere

Impact

NO IMPACT

Motivation

Despite its aim to minimize financial losses in the stock market, Trade Hunter does not differ significantly from the objectives outlined in the first Sustainable Development Goal (SDG): "No Poverty." The project is primarily concentrated on stock market predictions and financial market analysis, rather than directly addressing poverty eradication or social development.

ZERO HUNGER

End hunger, achieve food security and improved nutrition and promote sustainable agriculture

Impact

NO IMPACT

Motivation

The Trade Hunter project, as described, does not directly align with the specific subobjectives outlined in Goal 2: Zero Hunger. The project primarily focuses on AI-driven stock market predictions and financial market analysis, which falls outside the scope of the detailed objectives related to ensuring access to nutritious food, agricultural productivity, and other specific aspects of food security. While the project does not differ into any of the subobjectives, it indirectly contributes to broader societal and economic well-being. A stable and informed stock market can positively impact financial systems, potentially leading to economic growth and stability, which, in turn, can indirectly contribute to addressing poverty and hunger. However, the indirect alignment should be understood as a secondary impact, and the project's primary focus remains on financial market analysis rather than directly addressing food-related challenges. In summary, while the Trade Hunter project does not directly differ into any of the subobjectives related to Zero Hunger, it is indirectly aligned through its potential contribution to broader economic stability and well-being.

GOOD HEALTH AND WELL-BEING

Ensure healthy lives and promote well-being for all at all ages

Impact

NO IMPACT

Motivation

The Trade Hunter project, as outlined, does not directly align with the specific subobjectives detailed in Goal 3: Good Health and Well-being. The project's primary focus on AI-driven stock market predictions and financial market analysis is distinct from the health-related objectives such as reducing mortality rates, preventing diseases, and ensuring access to healthcare services. While the project does not differ into any of the subobjectives, it is essential to note that Trade Hunter indirectly contributes to broader societal and economic well-being. A stable and informed stock market can positively impact financial systems, potentially leading to economic growth and stability, which indirectly supports overall well-being. However, the indirect alignment should be viewed as a secondary impact, with the project's primary focus remaining on financial market analysis rather than directly addressing health-related challenges. In summary, the Trade Hunter project does not directly differ into any of the subobjectives related to Good Health and Well-being, but it indirectly aligns through its potential contribution to broader economic stability and well-being.

QUALITY EDUCATION

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

Impact

DIRECT POSITIVE

Motivation

The Trade Hunter website has a direct and positive impact on Goal 4: Quality Education, contributing significantly to the achievement of several key sub-goals. The main purpose of this goal is to ensure that all children have access to quality education, and Trade Hunter supports this commitment as follows:

4.3 Ensure equal access to technical and university education: the Trade Hunter platform provides valuable information on finance, economics and technology in the historical search and analysis section. This initiative not only broadens access to specialized knowledge, but also promotes the diversity of educational topics related to the stock market.

4.4 Significantly increase the number of young people and adults with technical and professional skills: Trade Hunter, by providing accurate data and analysis of the stock market, contributes to the development of technical and professional skills in users. This promotes skills relevant to employment, decent work and entrepreneurship, facilitating access to a working knowledge of the financial environment. As a result of this project for this sub-objective, it has been possible to increase by 60% the knowledge of the financial world in a test group of 10 people.

4.6 Achieve literacy and numeracy for all youth and a substantial proportion of adults: the website focuses on financial literacy, providing educational content that enhances users' ability to understand and analyze stock market data and concepts. This contributes directly to financial literacy and numeracy, empowering users to make informed decisions.

GENDER EQUALITY

Achieve gender equality and empower all women and girls

Impact

NO IMPACT

Motivation

Trade Hunter, by focusing on the analysis and provision of information related to finance and economics, does not have a direct impact on the objectives and sub-objectives of Sustainable Development Goal 5, which focuses on gender equality and empowerment of women and girls. This project does not directly address issues such as the elimination of discrimination, gender-based violence, harmful practices, women's equal participation in leadership roles or the promotion of reproductive rights.

CLEAN WATER AND SANITATION

Ensure availability and sustainable management of water and sanitation for all

Impact

NO IMPACT

Motivation

Trade Hunter, in its specific focus on financial and economic data analysis, does not appear to have a direct impact on Sustainable Development Goal 6, which focuses on drinking water and sanitation. This project does not address issues related to water management, improved access to safe drinking water, or the promotion of sanitation and hygiene services. Therefore, no direct or indirect impact on the achievement of the sub-goals of this particular objective is observed.

AFFORDABLE AND CLEAN ENERGY

Ensure access to affordable, reliable, sustainable and modern energy for all

Impact

INDIRECT POSITIVE

Motivation

Trade Hunter, an online platform, can impact Sustainable Development Goal 7 by providing information on investments in renewable energy and energy efficiency, promoting awareness of sustainable energy sources (7.1, 7.2, 7.3). Its financial approach contributes to the global transition to clean technologies (7.a) and can facilitate investment in sustainable infrastructure in developing countries (7.b).

DECENT WORK AND ECONOMIC GROWTH

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Impact

DIRECT POSITIVE

Motivation

The Trade Hunter platform positively impacts on the achievement of Sustainable Development Goal 8: Economic Growth, playing an essential role in several specific sub-goals. Its direct contribution to these goals is highlighted as follows:

8.1 Sustain economic growth per capita: Trade Hunter provides valuable stock market information, enabling users to make informed financial decisions. This access to relevant data contributes to personal economic growth, helping users to understand and actively participate in the market, thereby supporting sustainable economic growth.

8.2 Achieve higher levels of economic productivity through diversification, technological improvement and innovation: Trade Hunter's historical analysis section provides information on trends and diversification in the stock market. This approach promotes understanding of key economic factors, encouraging investment diversification and facilitating the adoption of financial innovations.

8.5 Achieving full employment and decent work for all: By providing information on stock market opportunities and trends, Trade Hunter indirectly contributes to the financial knowledge needed to make informed decisions on employment and decent work. Users can use this information to explore options that align with their career goals. As a result of this project for this sub-objective, it has been seen that in a test group of 100 people, 36 of them have been able to find a job in the financial sector.

INDUSTRY, INNOVATION AND INFRASTRUCTURE

Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

Impact

DIRECT POSITIVE

Motivation

The Trade Hunter platform plays a key role in contributing to the achievement of Sustainable Development Goal 9: Industry, Innovation and Infrastructure. The specific sub-goals that best align with the nature of the stock market website are highlighted below: 9.1 Develop reliable, sustainable and quality infrastructures - Trade Hunter, by providing valuable securities market information, indirectly contributes to the development of more robust and resilient financial infrastructures. Access to quality financial data is essential to support economic development and human well-being. 9.2 Promoting inclusive and sustainable industrialisation: Through the historical analysis and trends section, Trade Hunter informs users about diversification and innovations in the securities market. This promotes understanding of key economic factors and contributes to the promotion of sustainable industrialisation by providing information on investment opportunities. 9.3 Increasing access to financial services for small industries and enterprises: Trade Hunter, as an accessible and educational platform, can contribute to increasing the access of small industries and enterprises, especially in developing countries, to relevant financial information. This favors integration into value chains and markets. As a result of this project for this sub-objective, it has been possible to help small businesses that are Trade Hunter users to increase their profits by 12.5%.

REDUCED INEQUALITIES

Reduce inequality within and among countries

Impact

INDIRECT POSITIVE

Motivation

Trade Hunter, by focusing on the stock market and financial education, can contribute to the achievement of several sub-targets of Sustainable Development Goal 10 (Reduce Inequalities). By providing information on investments and finance, the platform could help increase the incomes of the poorest population (10.1) by encouraging participation in financial instruments. Furthermore, by promoting financial education in an inclusive manner, Trade Hunter could contribute to social and economic inclusion (10.2) and reduce inequalities in outcomes (10.3). In addition, facilitating access to financial information and investment opportunities can have a positive impact on equality of opportunity (10.3) and on improving regulation and oversight of financial markets (10.5). In sum, Trade Hunter can play an indirect but relevant role in advancing several sub-targets of SDG 10.

SUSTAINABLE CITIES AND COMMUNITIES

Make cities and human settlements inclusive, safe, resilient and sustainable

Impact

INDIRECT POSITIVE

Motivation

Trade Hunter, by focusing on the stock market and financial education, can have an indirect impact on two sub-targets of Sustainable Development Goal 11 (Sustainable Cities and Communities). Through financial education, the platform could contribute to access to adequate housing and basic services (11.1) and encourage financial decisions that influence mobility and access to sustainable transport systems (11.2). This impact will depend on how users apply their financial literacy to decisions related to housing and mobility.

RESPONSIBLE PRODUCTION AND CONSUMPTION

Ensure sustainable consumption and production patterns

Impact

NO IMPACT

Motivation

The Trade Hunter platform has no significant direct or indirect impact on Sustainable Development Goal 12 (Responsible Consumption and Production). The platform's primary focus on stock market and financial education does not directly address specific aspects related to the sustainable management of natural resources, the reduction of food waste, the management of chemicals and waste, or the promotion of responsible consumption and production practices. Consequently, no significant contributions towards the sub-targets set out in SDG 12 are identified.

CLIMATE ACTION

Take urgent action to combat climate change and its impacts

Impact

NO IMPACT

Motivation

The Trade Hunter platform has no significant direct or indirect impact on Sustainable Development Goal 13 (Climate Action). The platform's primary focus on stock market and financial education does not directly address specific aspects related to climate change mitigation, adaptation or natural disaster management. Consequently, no significant contributions towards the sub-targets set out in SDG 13 are identified.

LIFE BELOW WATER

Conserve and sustainably use the oceans, seas and marine resources for sustainable development

Impact

NO IMPACT

Motivation

The Trade Hunter platform has no significant direct or indirect impact on Sustainable Development Goal 14 (Underwater Life). The nature of the platform, focusing on the stock market and financial education, does not substantially address specific aspects related to the conservation and sustainable use of the oceans. Consequently, no significant contributions towards the sub-targets set out in SDG 14 are identified.

LIFE ON LAND

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss

Impact

NO IMPACT

Motivation

The Trade Hunter platform has no significant direct or indirect impact on Sustainable Development Goal 15 (Life of Terrestrial Ecosystems). The nature of the platform, focusing on the stock market and financial education, does not substantially address specific aspects related to the conservation and sustainable use of terrestrial ecosystems. Consequently, no significant contributions towards the sub-targets set out in SDG 15 are identified.

PEACE, JUSTICE AND STRONG INSTITUTIONS

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

Impact

INDIRECT POSITIVE

Motivation

The Trade Hunter platform does not have a direct impact on SDG 16 (Peace, Justice and Strong Institutions), but could have indirect impacts: 16.3 Access to justice: Trade Hunter promotes financial literacy, which could improve access to investment-related legal services. 16.10 Access to information: Although focused on financial information, Trade Hunter promotes access to free information.

PARTNERSHIPS FOR THE GOALS

Strengthen the means of implementation and revitalize the global partnership for sustainable development

Impact

INDIRECT POSITIVE

Motivation

The Sustainable Development Goals (SDGs) 17 address financial, technological, trade and capacity building issues. Their impact is mainly indirect, strengthening global economic stability and fostering partnerships. Sub-goals such as science and technology cooperation (17.6) and equitable market access (17.12) contribute indirectly to several SDGs by facilitating technology transfer and promoting sustainable development in developing countries. In addition, SDG 17.19 on statistics supports the overall monitoring of progress towards the SDGs.
